

NOBO

The NOBO electronic safe is a multipurpose model that offers all the functions demanded by hotels and tourist accommodation.

general characteristics

A safe with a highly visible, white backlit screen and keyboard.

Simple for guest management, it offers the owner different emergency opening and audit methods to help resolve possible incidents. NOBO has become an icon in versatility and comfort.

Convenience and safety for your guests

NOBO offers a balance between convenience and safety; both being highly valued by guests.

Options for rental, RFID or iButton opening and auditing, among others, make NOBO a polyvalent safe for guests and owners of hotels and tourist accommodation.

standard features

- Electronic, motorised opening and closing
- Bolts with anti-lever protection
- **Audit, of the last 400 events (opening + closing),** with handheld unit
- Guest code from 3 to 6 digits
- Emergency opening via:
 - Master code
 - Mechanical key
 - Handheld device
- Low consumption LED interior lighting
- ADA keyboard, acoustic and visual signals to facilitate operation for people with visual or hearing disabilities.
- Door with opening spring

available dimensions

* iButton is an alternative emergency opening method to the traditional mechanical lock.

The iButton system is a more secure option, as it cannot be duplicated, unlike physical keys. Additionally, the administrator can cancel and/or reprogramme the opening permissions for an iButton-equipped safe.

Safes with iButton are especially designed for large establishments and cruise ships.
